for Biodefense and Emerging Infectious Disease

New England Regional Center of Excellence for Biodefense and Emerging Infectious Diseases (NERCE/BEID)

Harvard Medical School, Boston, MA 02115

Visiting Investigator Laboratory Training Statement

If you are not a Harvard affiliate, please complete this form and return it to the NSRB prior to commencing work in the screening facility.

Your home institution is responsible for implementing a worker protection program that is in compliance with all applicable regulations. Your employer must provide any required environmental, health, and safety training. This training may include, but is not limited to: laboratory safety, biosafety, chemical safety, hazard communication, spill prevention, occupational exposure to bloodborne pathogens, hazardous waste management, and personal protective equipment training.

By signing below, the Visiting Investigator and the Biosafety Official at the Investigator's home institution acknowledge that all appropriate biosafety, chemical safety and laboratory safety training appropriate for the studies to be conducted at the NSRB have been completed.

Signatures

Acknowledged and Agreed:
